

Trends in ICT Policy in Japan

September 7, 2006

Hiromu Momma

Director

Space Communications Research Office
Information and Communications Policy Bureau
Ministry of Internal Affairs and Communications

The Progress of Japan's IT Strategy

Stage 1

- ◆ IT Basic Law (Nov. 2000)
- ◆ Foundation of IT Strategic Headquarters (Director General: Prime Minister) (Jan. 2001)

e-Japan Strategy
(Jan. 2001)

IT infrastructure
development

e-Japan Strategy II
(Jul. 2003)

Emphasis on IT use and
application

Stage 2

A front-runner leading the
global IT revolution

New IT Reform
Strategy (Jan. 2006)

Pursuit of IT structural
reform capabilities

Realization of a
self-sustaining IT
society

MIC's Network Policies

MIC's u-Japan Policy

2001

2003

2006 ~

The Pursuit of IT Structural Reform Capabilities

Solving the problems that Japan's society faces by using IT

Structural reform of healthcare through IT

An environmentally-friendly society that utilizes IT

A world-leading safe and secure society

World's safest road traffic environment

World's most convenient and efficient electronic government

Business competitiveness enhanced through the use of IT in management

Prosperous lifestyles throughout people's lifetimes

Development of IT Infrastructure

Developing the infrastructure that will support IT structural reform capabilities and serve as the foundation for a ubiquitous network society

An IT society that adopts universal designs

Development of an "anytime, anywhere, for anything, and by anyone" infrastructure and a society without a digital divide

The world's most secure IT society

Development of human resource bases with an eye towards the next generation

Education and human resource development that will produce human resources that will be competent anywhere in the world

Promotion of the R&D that will form the foundations for the next-generation IT society

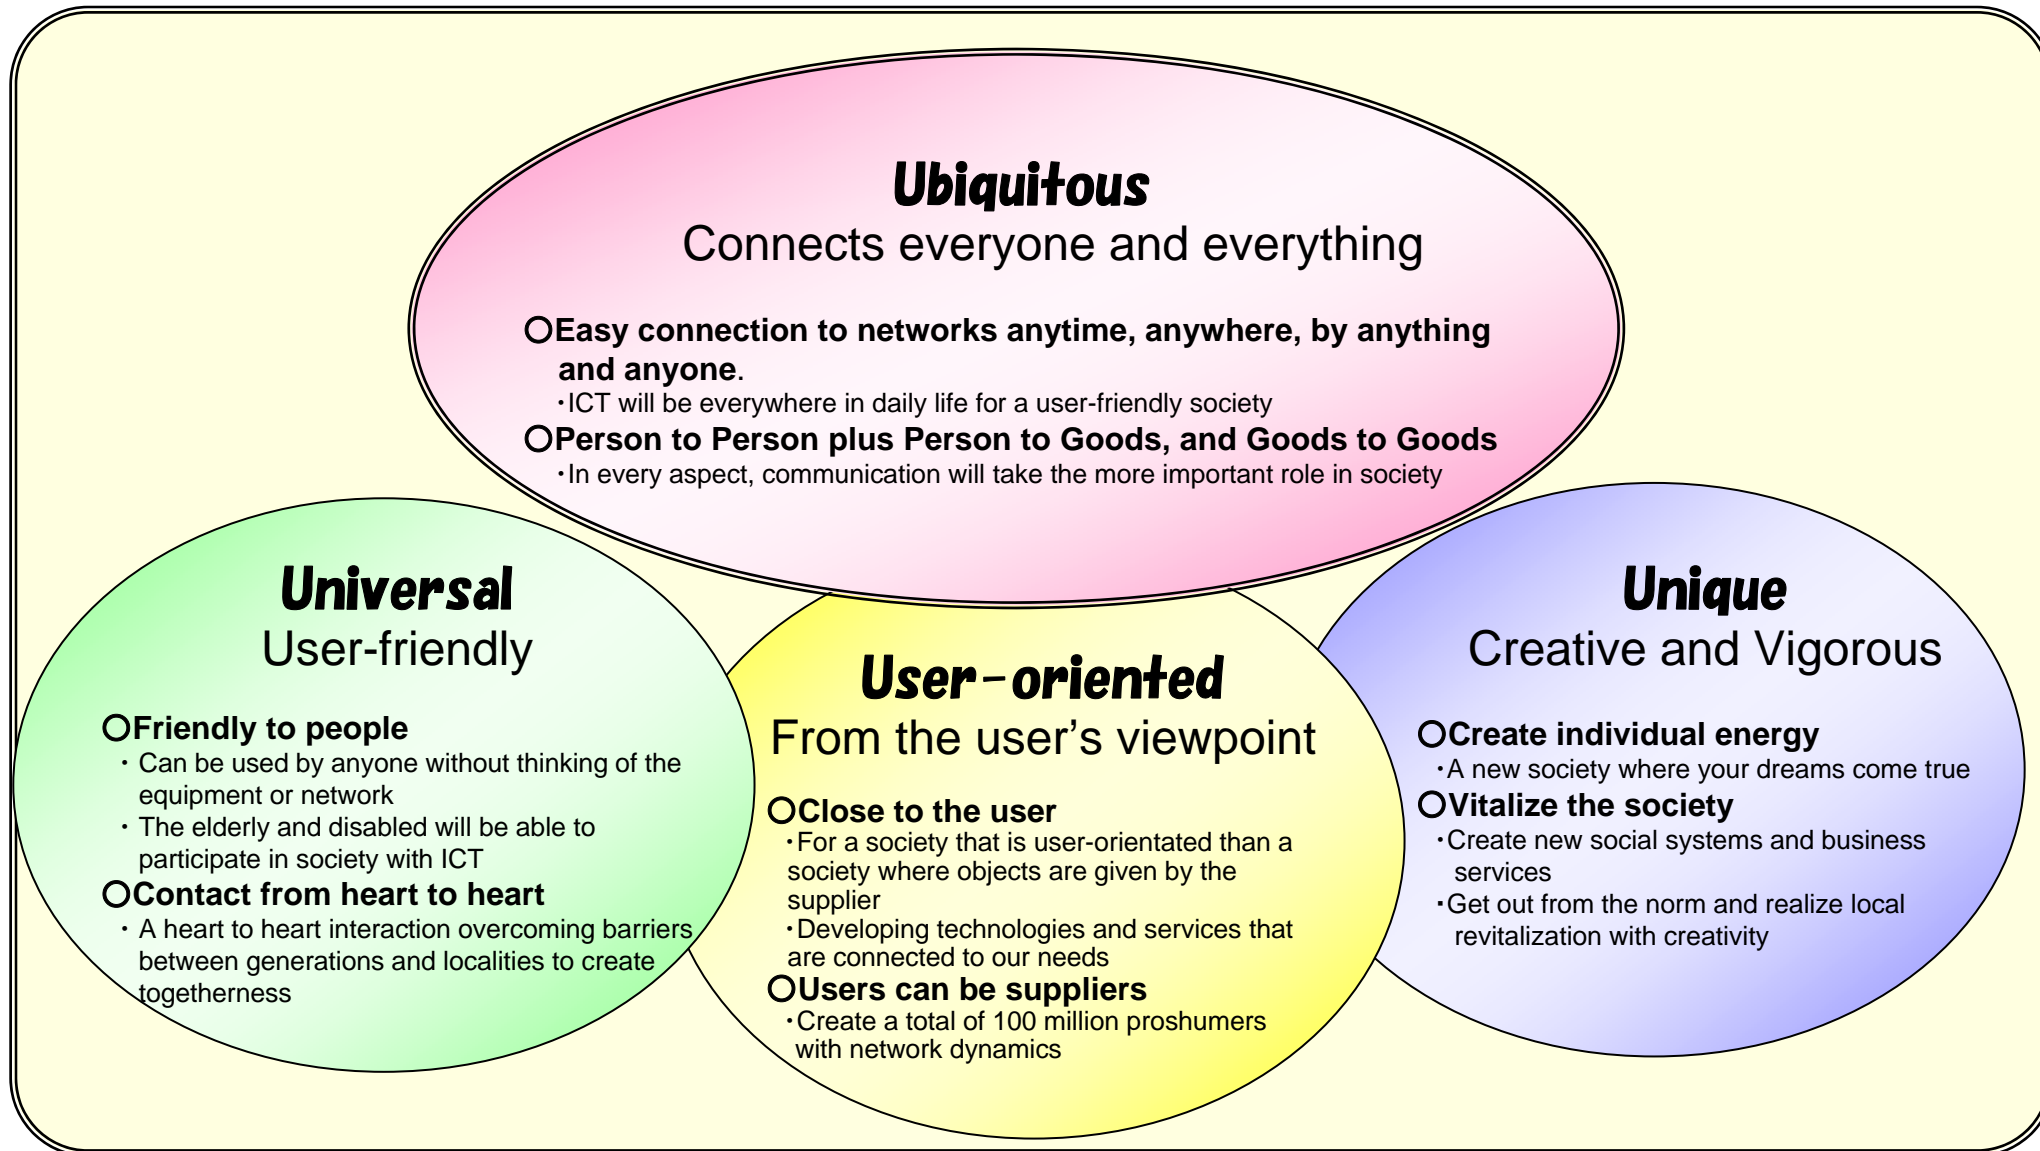

Sharing Information with the Rest of the World

Sharing Japan's structural reform capabilities with the rest of the world and making international contributions

Measures to enhance the presence of Japan in international competitive society

Measures to make international contributions by providing problem-solving models

The u-Japan Concept

4U = For You

Structure of the "u-Japan Policy"

Ubiquitous Network Society

100% of population
can access to
broadband services

More than 80% of
population can
appreciate the role of
ICT in resolving major
issues

More than 80% of
population can feel
safe in using ICT

Development of
ubiquitous networks

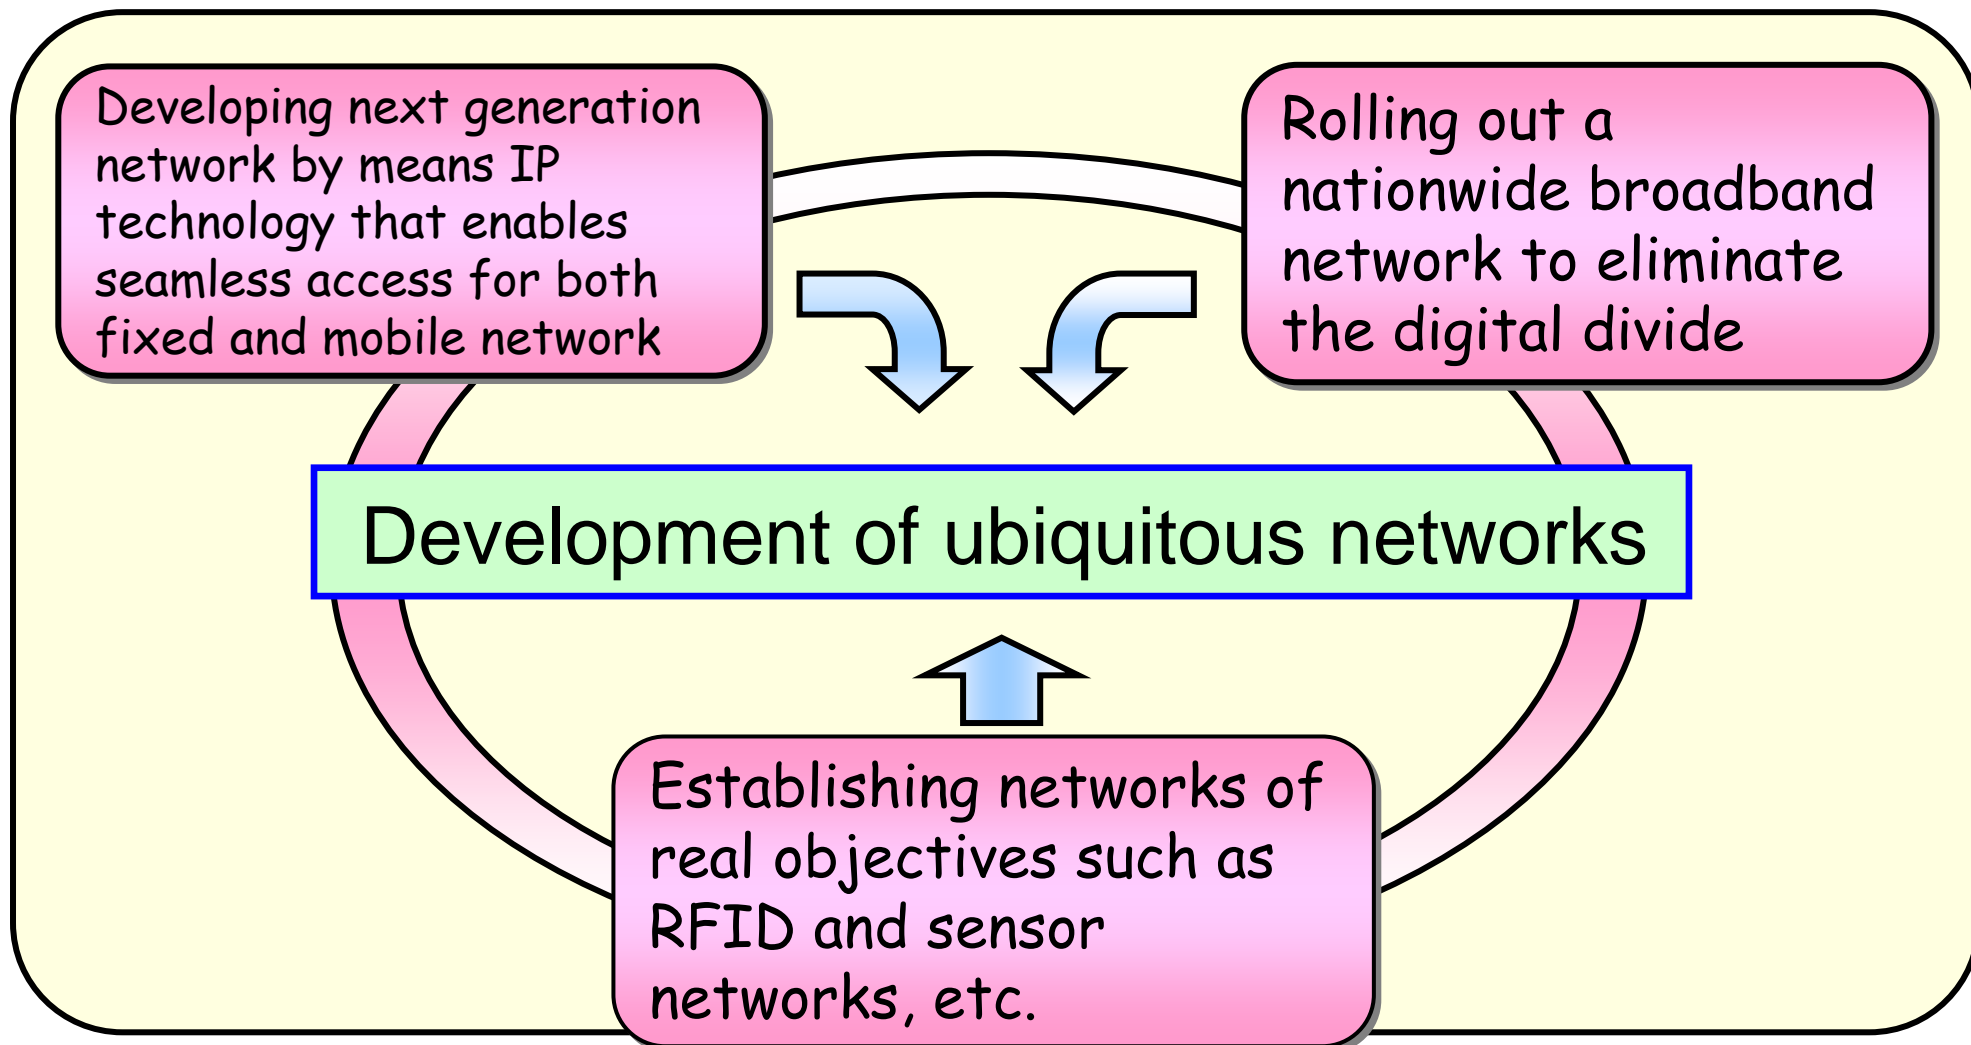

Enhancement of ICT
applications

Improvement of
environment for
the use of ICT

Promotion of ICT R&D (UNS Strategic Program)
&
International Cooperation

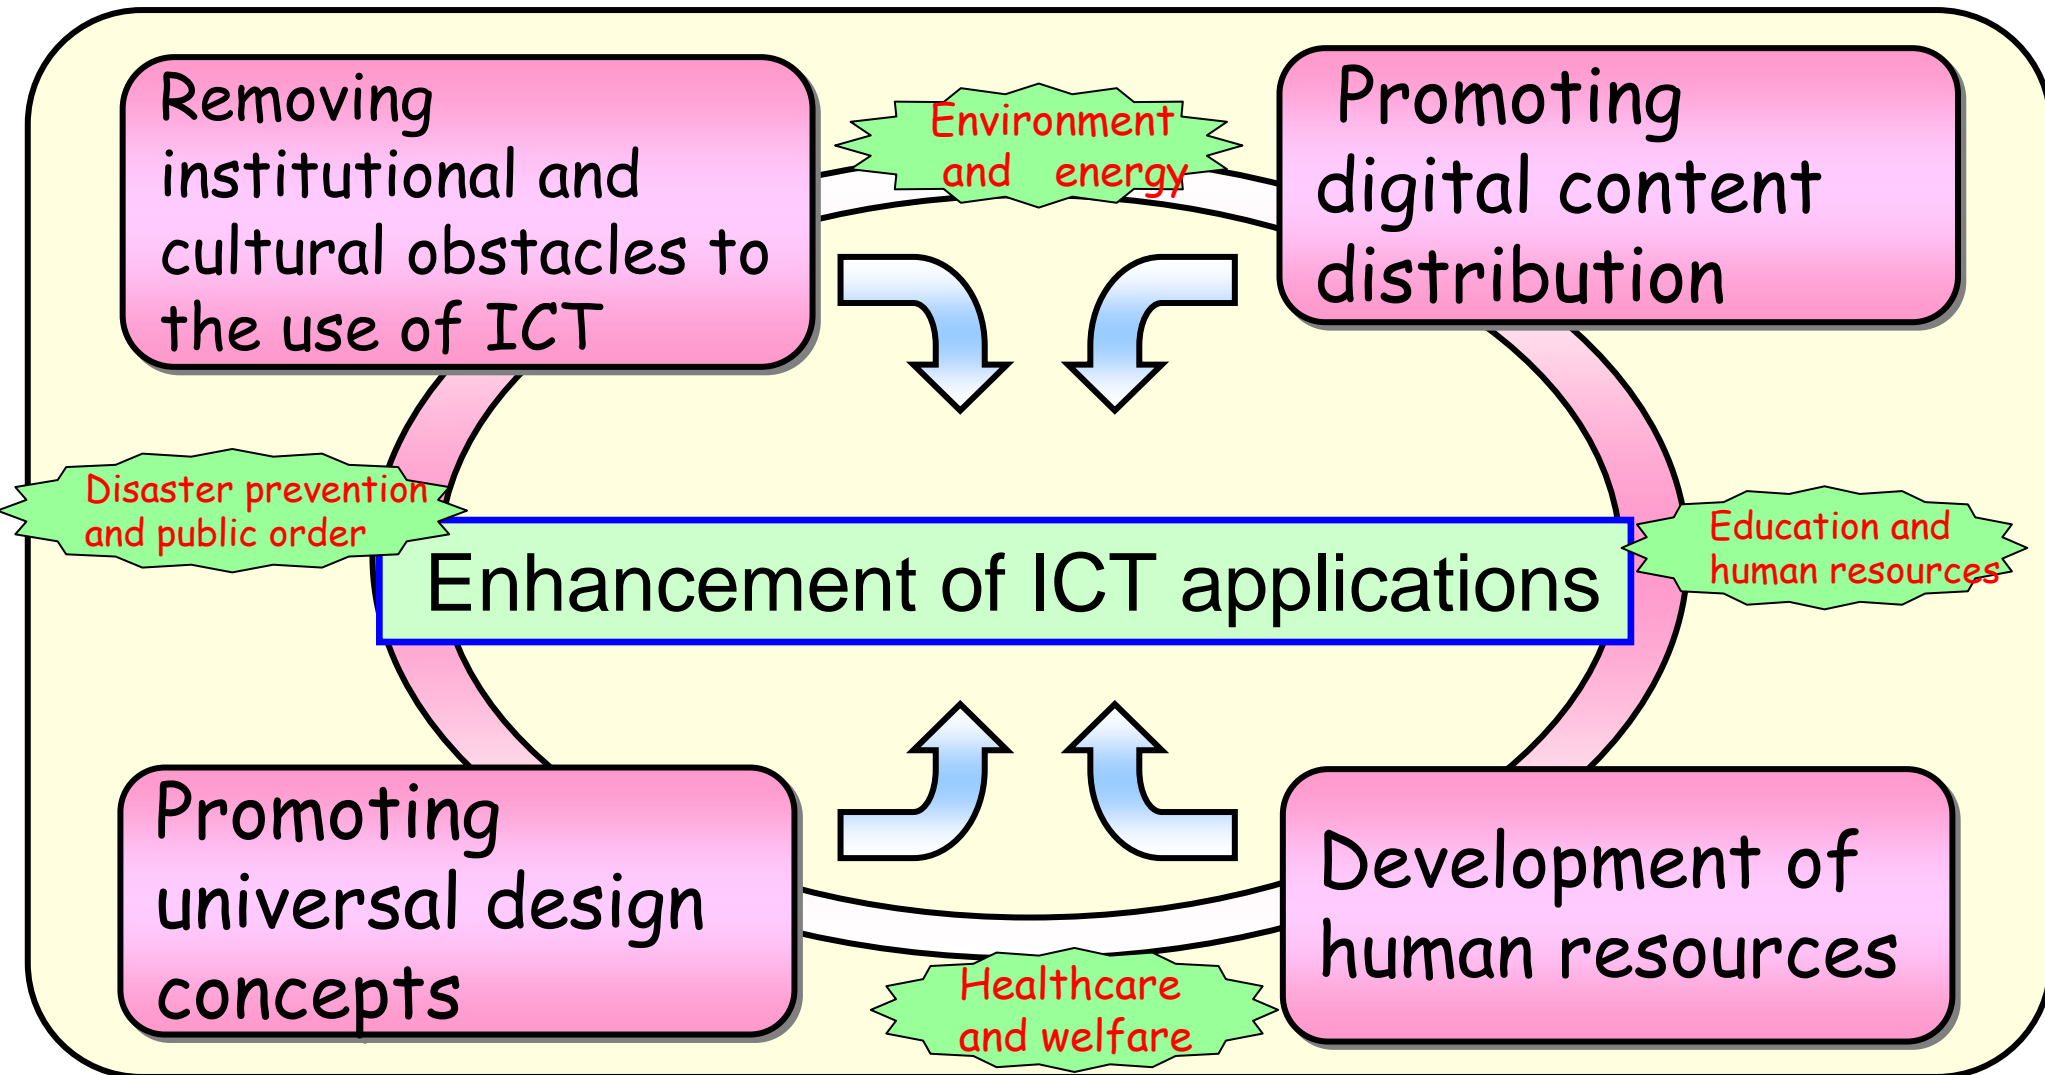

Ubiquitous Network Establishment

First goal: 100% of population can access to broadband services

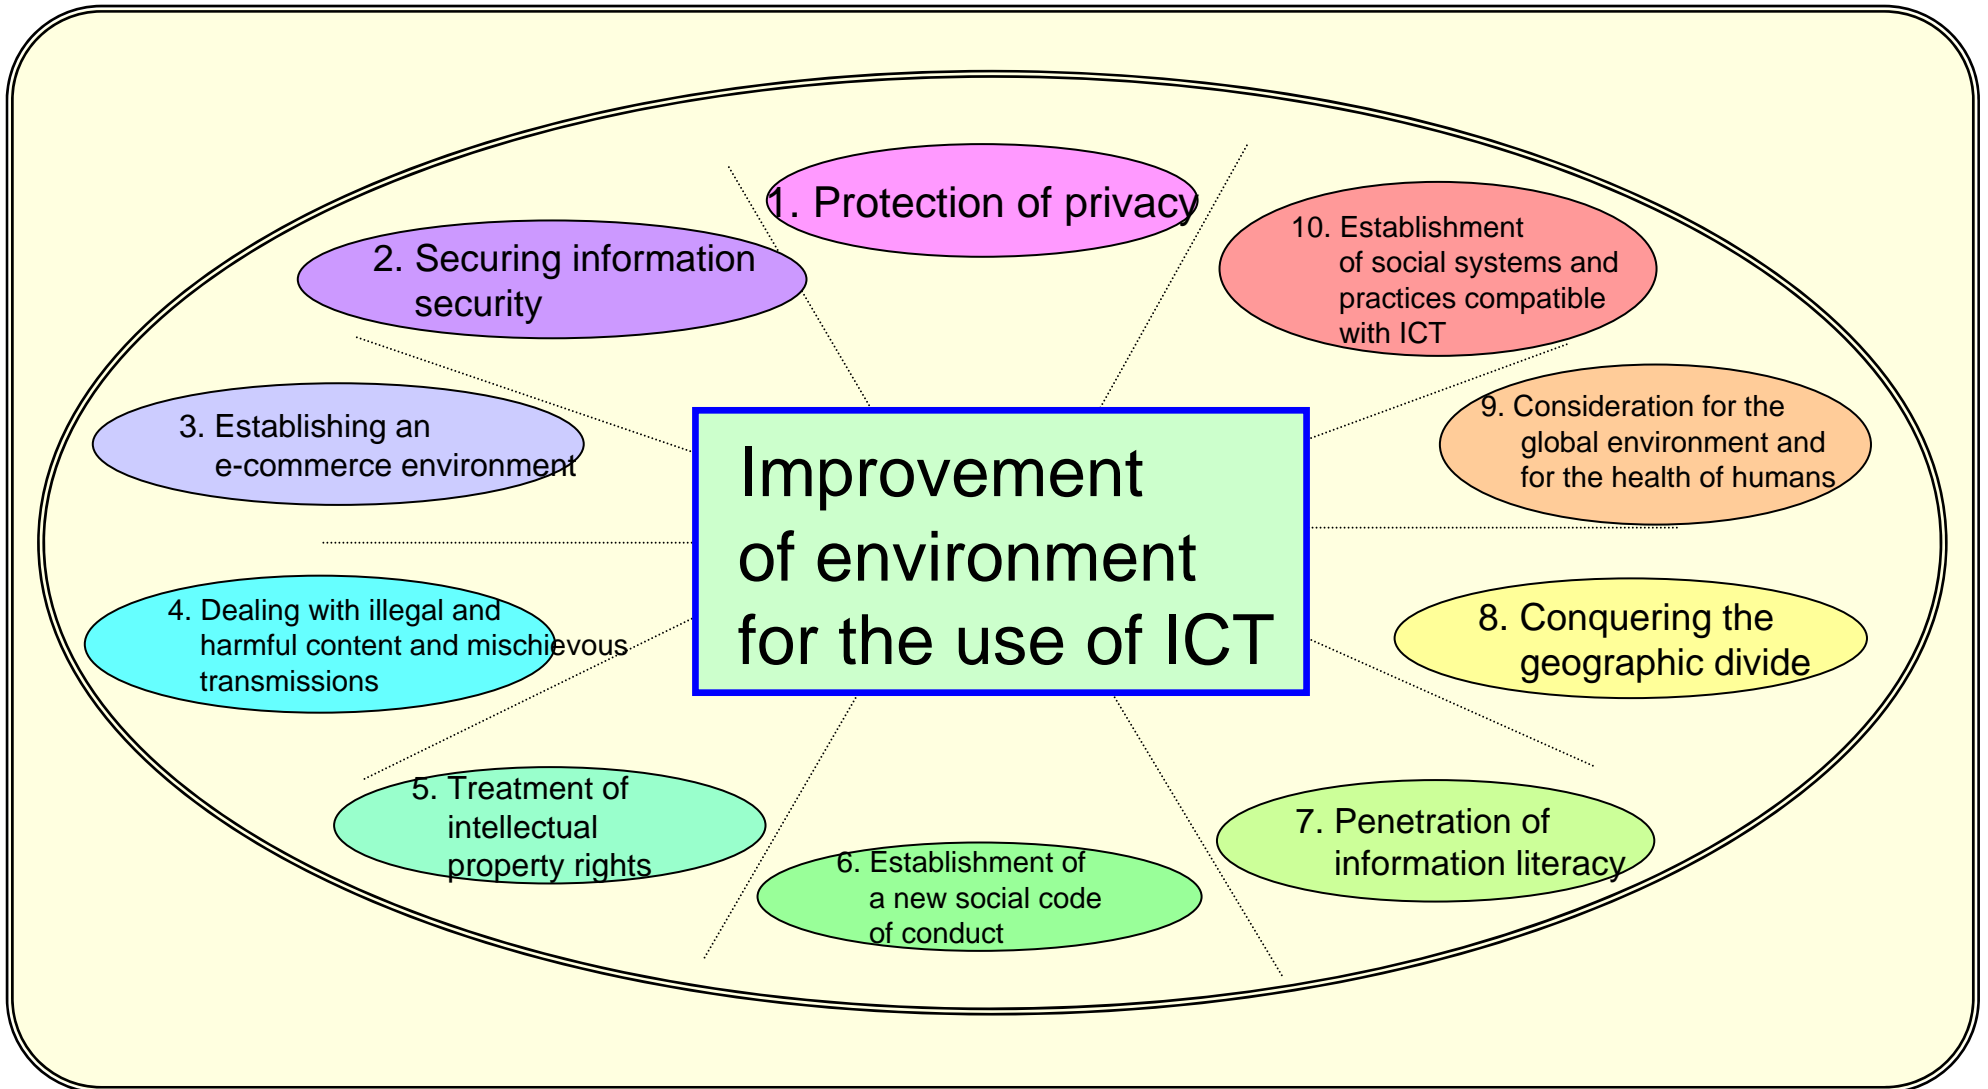

Enhancement of ICT Applications

Second goal: More than 80% of population can appreciate the role of ICT in resolving major issues

Usability Arrangement

Third goal: More than 80% of population can feel safe in using ICT

Technological Strategy (UNS Strategic Program)

Ubiquitous Network Society Strategic Program

New-Generation
Networks Technologies

- Next-generation backbone network
- Photonic network
- Wireless network
- Satellite Communication

etc.

ICT Security and Safety
Technologies

- Info-communication Security
- Ubiquitous sensor network
- RFID

etc.

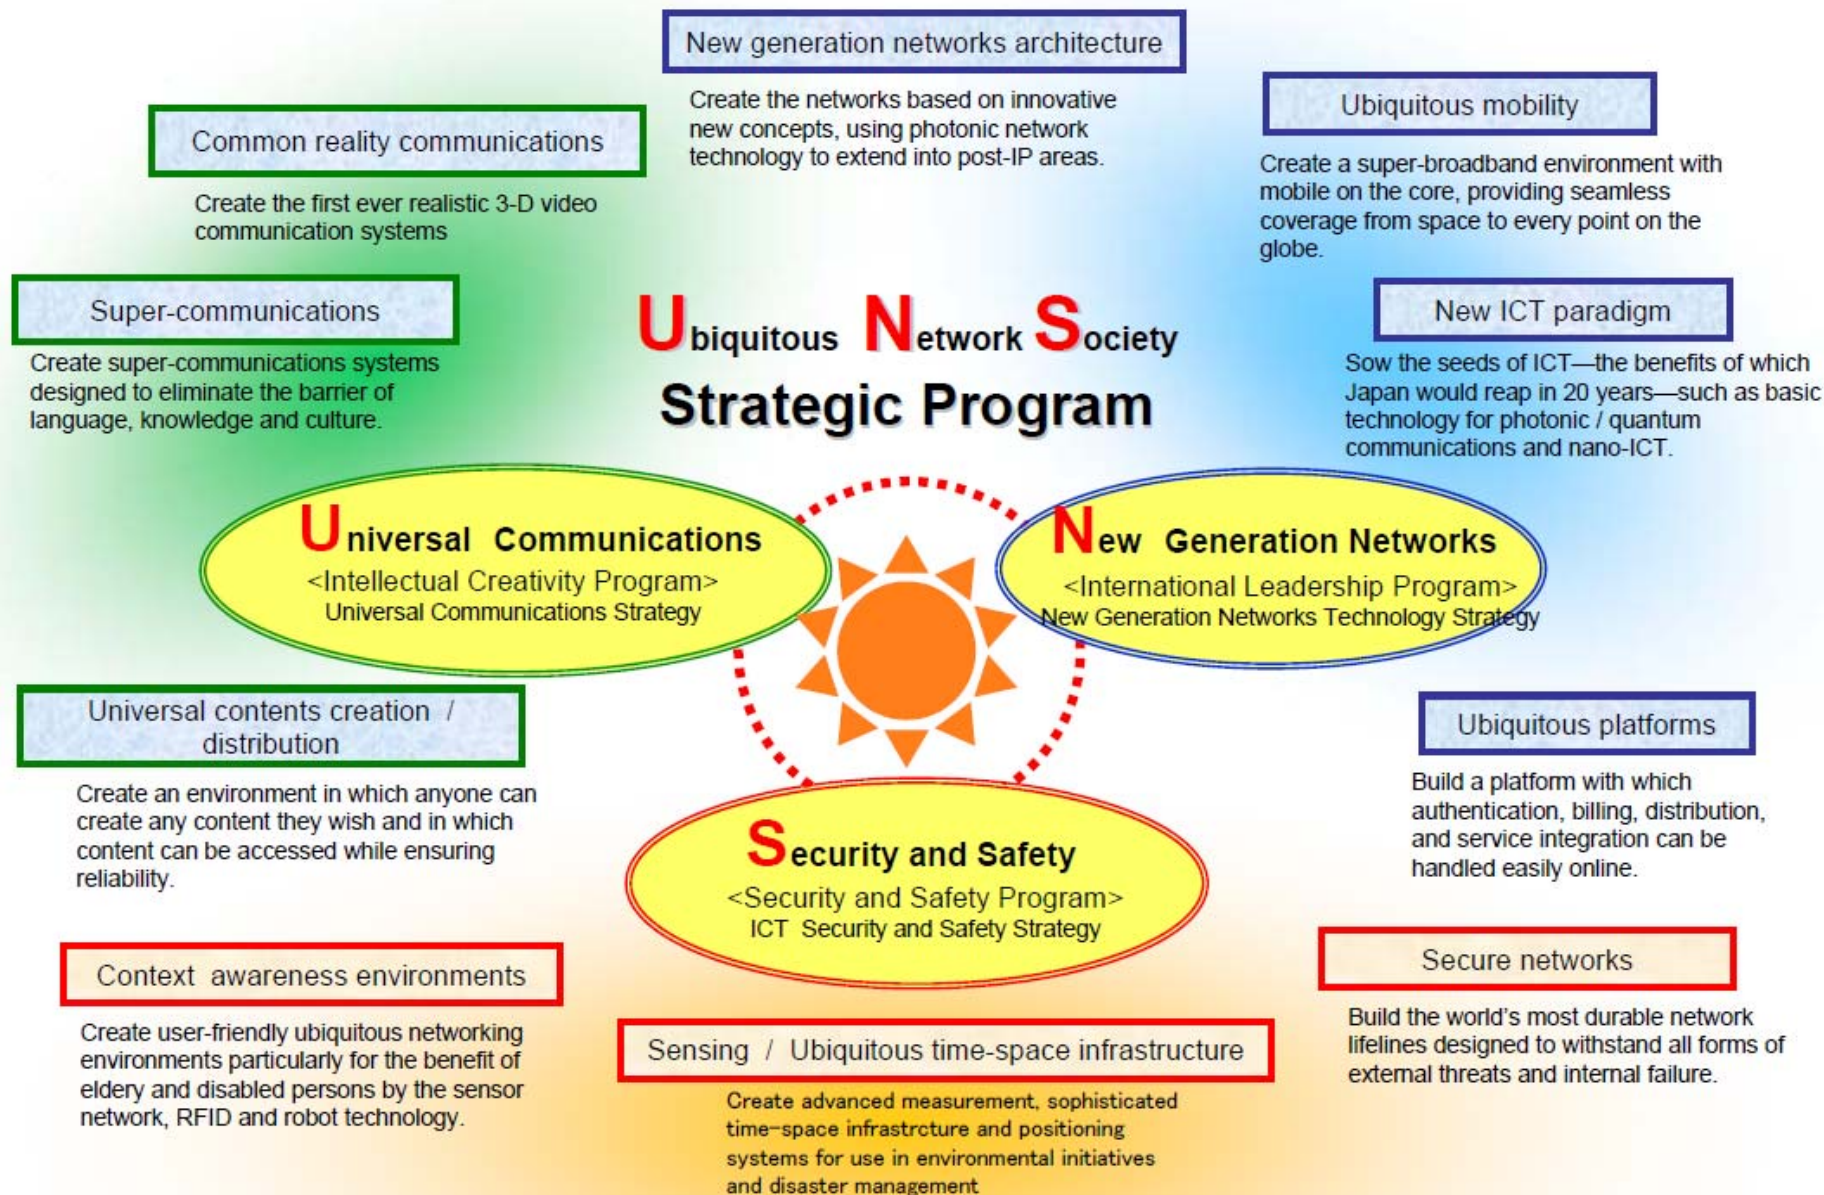

Universal Communications
Technologies

- Three-dimensional television
- Automatic translation

etc.

Overview of the UNS Strategic Program

Role of Network Testbeds

A front-runner leading the global
IT revolution & realization of a self-sustaining IT society

New IT Reform Strategy

u-Japan Policy (**Ubiquitous Network Society**)

R&D of Universal
Communications
Technologies

R&D of New-
Generation Networks
Technologies

R&D of ICT
Security and
Safety Technologies

Network Testbeds

Outline of JGN and JGN II

1999

2003 2004

ATM-based network
(implementation of IPv6 network
from 2002)

IPv6-based and optical network
(Japan-U.S., Japan-Singapore and Japan-Thailand links
also available)

Usage of JGN II

Thank you!
